

GREENHORIZONS SPECIALTY PRODUCT DATA SHEET

RHIZOMATOUS TALL FESCUE

CHARACTERISTICS AND RECOMMENDED USES:

Greenhorizons Turf-type Tall Fescue is an exclusive blend of semi-rhizomatous Tall Fescue that produces a dense, non-spreading stand of dark green turf requiring little fertility or irrigation. GHG Turf-type tall fescue is ideal for municipal or residential applications where limited fertilizer and water inputs are a factor. This turf has excellent heat and drought resistance and is enhanced with endophytes to resist insect pests. It is known to be wide bladed and dark green in colour.

IDEAL APPLICATIONS:

- Low-to-medium traffic, non-irrigated golf course areas
- Non-irrigated parks
- Roadsides or water-restricted communities

AVAILABLE FORMATS:

- Small rolls (24 inches wide, 5 feet long)
& up to 700 square feet per skid
- Big rolls (42 inches wide, 80 feet long)
& up to 15,400 square feet per truckload

At Greenhorizons, we produce GHG Turf-type Tall Fescue on sandy loam soil at a facility in Southwestern Ontario that is central to our customer base to ensure timely shipping of product. Whether you require our GHG Turf-type Tall Fescue for small repairs or your entire project, count on us to deliver an outstanding quality sod every time!
